

CCST8

The CCST8 stripping tool for shielded and coaxial cable

CCST8

The CCST 8 stripping tool allows you to strip shielded and coaxial cables using the three blades fixed in the tool – all in a single operation. It also strips up to three layers (conductor, dielectric and shield).

The cutting depth can be individually varied for each blade with a screw depending on the diameter of the cable; diameters of up to 8 mm can be stripped.

The separation between the blades is pre-set to suit RG58 and RG59.

The facts at a glance

- Pre-set for RG58 and RG59 (gap between the blades)
- Adjustable for different diameters (up to 8 mm)
- Three stripping procedures in one step: conductor, dielectric, shield

CCST8

Order information and technical documentation

CCST8

Stripping tool for shielded and coaxial cable up to 8 mm in diameter

- Pre-set for **RG58** and **RG59**
- Adjustable for different diameters (up to 8 mm)
- Three stripping procedures in one step: conductor, dielectric, shield

CCST8

Type	CCST8	Qty.p.pck.
Cat. no.	17355.0	1
Dimension (L) and weight		
Length	110 mm	
Weight	50 g
